## SUMMARY

Java backend developer focused on Spring Boot, secure REST APIs, authentication, and data platforms. Hands-on with Java, Spring Security, React, MongoDB, MySQL, Redis, Docker, and cloud deployment; active open-source contributor with 13 authored PRs across Redis, Hazelcast, Apache Spark, Appwrite, and other projects.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, Python, C, C++, SQL, HTML, CSS  
**Backend:** Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, REST APIs, JWT, Multithreading  
**Frontend:** React.js, React Native, JavaScript  
**Data and Cloud:** MySQL, MongoDB, Redis, Aiven, Docker, Railway, Vercel, Netlify  
**Tools and Concepts:** Git, GitHub, Postman, OOP, DSA, Agile Development, API Design

## EXPERIENCE

**Modern Age Coders** Remote  
*Coding Tutor and Hackathon Judge* Mar 2026 – June 2026  
– Taught 100+ students Python, Java, Scratch, data structures, algorithms, and object-oriented programming through structured live sessions.  
– Judged hackathon submissions, evaluated implementation quality and product thinking, and provided actionable technical feedback.

**Infosys Springboard** Remote  
*Java Backend Developer Intern* Dec 2025 – Feb 2026  
– Contributed to a Smart Procurement and Vendor Management System using Java, Spring Boot, Hibernate, React, and Agile delivery practices.  
– Built backend modules for business logic, persistence, and REST workflows using Spring MVC, JPA, and Spring Security.

## SELECTED PROJECTS

**Voxo** | *Java 21, Swing, whisper.cpp, Speech-to-Text* | GitHub 2026  
– Built a privacy-first desktop speech-to-text application with local `whisper.cpp` inference, microphone and audio-file transcription, and no cloud API dependency.  
– Added multilingual transcription, timestamped `.srt` subtitle export, local transcript history, keyboard shortcuts, and reproducible Windows, macOS, and Linux build scripts.

**JournalApp** | *Spring Boot, JWT, Spring Security, MongoDB, Redis* | GitHub 2026  
– Built a secure journaling platform with JWT authentication, role-based access control, MongoDB persistence, and a custom Spring Security filter chain.  
– Added Redis cache-aside workflows, scheduled weekly sentiment-summary emails, and a layered controller-service-repository architecture for maintainable integrations.

**TransitOps** | *Java, Spring, REST APIs, Fleet Operations* | GitHub 2026  
– Developed a logistics and fleet-management platform covering dispatch, trips, drivers, maintenance, and operating costs.  
– Designed domain-focused REST workflows for operational data, status changes, cost tracking, and day-to-day fleet decisions.

**Smart Spend** | *React, Spring Boot, MySQL, JWT, Vercel* | GitHub 2026  
– Built a full-stack personal-finance application for expense tracking, spending insights, and authenticated user workflows.  
– Connected React, Spring Boot, MySQL, and JWT authentication, then deployed the application through Vercel and Railway with interactive spending views.

## OPEN SOURCE CONTRIBUTIONS

**13 authored PRs** | *Redis, Hazelcast, Apache Spark, Appwrite, Quarkus, Apache Ignite, OpenRewrite*  
– Merged in Redis: PR #15491 removed obsolete xxhash clean targets and eliminated noisy build errors from a non-vendored test directory.  
– Active PRs include Redis #15512, Hazelcast #26606, Appwrite #12946, and Apache Spark #57356; contributions span C, Java, Scala, TypeScript, PHP, tests, concurrency, and build tooling.

## EDUCATION

**SAGE University Indore** Indore, India  
*Bachelor of Technology in Computer Science and Engineering, CGPA: 7.7/10* Expected Jul 2026  
*Relevant coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Computer Networks, Software Engineering.*
